Index of Subjects

API 50 CH method for yeasts (ISON) 9
Aeromonas caviae (HUNTER & BURGE) 45
Aflatoxin B1 (KAVERI, FREMY, LAPEYRE & STROSBERG) 71
Aluminium toxicity (JOHNSON & WOOD) 137
Bacillus licheniformis α-glucosidases (MOORE & PRIEST) 1
Bacterial production and mortality (MARTINEZ, GARCIA & VIVES-REGO) 145
Bacteriophage resistance (HICKS & ROWBURY) 129
Cellulase adsorption (STUTZENBERGER) 47
Cellulomonas classification scheme (MCHAN & COX) 33
Clostridium beijerinckii (BRAZIER & MAYHEW) 59
Coagulase-positive staphylococci (O'TOOLE) 111
Coliphages (NUTTALL & PARRY) 117
Germination of bacterial spores (ANDO & TSUZUKI) 65
Heat resistance of *Salmonella* (MACKEY & DERRICK) 13
Heparinase assay (RILEY) 21
Hydrophobicity of *Streptococcus salivarius* HB (HOGG & OLD) 99
Irradiated media (EISENBERG, PADOVA, STEIN, DONA & STOTLAND) 61
Leptospira interrogans (HOOKEY, WAITKINS & PALMER) 25
Lidocaine (TSUCHIYA, SATO, KAMEYAMA, TAKAGI & NAMIKAWA) 141
Lignocellulose degradation (NJOKU & ANTAI) 133
Listeria monocytogenes (DOMINGUEZ, GARAYZABAL, VAZQUEZ, BLANCO & SUAREZ) 125
Monoclonal antibodies to Shigella (ISLAM & STIMSON) 85
Mutant enrichment for *Serratia marcescens* (TRIAS, VIÑAS, GUINEA & LORÈN) 81
Mycotoxins (LAND & HULT) 41
Noxythiolin uptake (MCCAFFERTY, GORMAN, WOOLFSON & ANDERSON) 51
Osmophilic yeasts (PETTIPHER) 95
Protoplast regeneration (BHATT, SUBRAMANYAM & DIAS) 77
Restriction endonuclease fragments (OWEN & BECK) 5
Seawater (MUNRO, LAUMOND & GAUTHIER) 121
Serotyping of *Aeromonas* spp. (FRICKER) 113
Siderophore assay (NAMBIAR & SIVARAMAKRISHNAN) 37
Sporulation of *Bacillus* (LEAPER) 55
Taurolidine (GORMAN, MCCAFFERTY, WOOLFSON & JONES) 103
'*viridans*' streptococci identification (MANNING & HOGG) 17
V_{max} for glucose mineralization (GOULDER) 29
Wine yeasts and bacteria (LEMARESQUIER) 91
